Product information on sedum roof covering from manufacturer:

SEDUM ROOF COVERING

Enviromat is a living carpet of sedum plants for outdoor use and one of the lowest maintenance garden products available in the UK.

Grown on to a special matting for strength, versatility and easy installation, Enviromat comes complete with mature sedum plants already established in a life-times supply of growing medium.

Enviromat includes a varied mix of flowering sedum plants for all year round colour and texture. With Enviromat there is no need for mowing or deadheading. Enviromat can help attract wildlife to a location and is suitable for numerous applications including:

- sedum roofs for sheds, summerhouses or stables
 - an alternative to an ornamental grass lawn
 - planters
 - pond surrounds
 - sedum mat banks
 - borders
 - topiary

Enviromat is cultivated on a large scale in Norfolk. It takes up to 12 months from start to finish to bring Enviromat to a stage to where it meets our quality standards.

Plant Species in Enviromat

<i>S. album</i>	White Stonecrop
<i>S. kamtschaticum</i>	Gold Sedum
<i>S. pulchellum</i>	Widow's Cross
<i>S. reflexum</i>	Crooked Yellow Stonecrop
<i>S. spurium</i>	Two-row stonecrop
<i>S. sexangulare</i>	Tasteless stonecrop
