| 2020/1456/P | | 03/05/2020 21:22:43 | OBJ | I object to the mast being placed on a residential property. While there is any uncertainty over the possible impact on people's health it is extremely unfair to place the 5G masts above family homes, particularly when those families do not have consent over that decision. Safety should be the absolute priority, particularly on children's health. There is also the issue of Dartmouth Park being a conservation area and the corner where Haddo House, a Council block of local interest, is highly visible. I am not sure that many private residents in the area would be happy to have the masts placed on their homes, it seems highly unreasonable to expect that because we are Council tenants we should have to accept this imposition. |
| 2020/1456/P | | 02/05/2020 12:55:50 | OBJ | Haddo House is a well maintained and much loved iconic building in the Dartmouth Park Conservation area. These masts will ruin the overall aspect of this building and the resulting view for miles around. It will impact on the protected view of Hampstead Heath. The residents of Haddo House and the surrounding area do not want this mast - it is neither fair nor reasonable to impose this mast on residents. If the decision to process this planning application Covid-19 lockdown has been taken without a due risk assessment and Equalities Impact assessment on how the lockdown is affecting the democratic ability of the local community to be fully consulted during the planning application process - then this leaves open Camden to possible legal action from residents in the future. |
| 2020/1456/P | | 03/05/2020 13:33:44 | COMMNT | This is bad news for our conservation area and should not be allowed. The residents of Haddo House and the general community in Gospel Oak do not want it. Please kick this planning application into touch. |
| 2020/1456/P | | 03/05/2020 21:52:21 | OBJ | These masts should be placed on office buildings, not residential. It should be that simple. |
| 2020/1456/P | | 01/05/2020 15:09:22 | OBJ | I oppose the installation on the basis of numerous scientific studies highlighting the potential ill effects of 5g antennas. |
| 2020/1456/P | | 02/05/2020 13:22:25 | COMMNT | I am a current resident of Haddo house and I strongly disapprove of this planning application for the 5G masks. Residents have been poorly informed and deliberately keep in the dark about the councils plans. I hav and the thought of having not 1 but 3 mobile phone mask above our flat is ridiculous. The health risks may not be visible now but I dont want to go 5 years down the line and find out that my family was put at risk due to the masks. I will continue to strongly protest until this decision is reversed by the council. |

|-----------------|------------------|---------------------|----------|---|
| 2020/1456/P | | 02/05/2020 11:04:19 | OBJ | <p>Haddo House is a much loved landmark in our area. It is a beautifully designed piece of architecture and part of the Architectural Associations regular tour of classic designs for social housing. To put a phone mast on it would spoil the design and really have a depressing effect on our residents. Personally when I see it on my way home as I walk down Chetwynd road it is a high point of my journey.</p> <p>I understand that the residents themselves have objected to this. Surely their voice counts. It sends a very bad signal about Camden's planning policies that the objections of tenants in their own council housing blocks are going ignored.</p> <p>We live in an area of high pollution, our lives are already being limited by this. It is an area with a high proportion of families and 4 large schools nearby. Mobile phone masts placed here could further increase the health risks imposed upon us daily. Please do not allow this plan to go forward</p> |
