The Council has considered your application and decided to grant permission

#### 1 Reasons for granting approval

A lighting method statement, detailing how the proposed lighting system would operate, be monitored and managed, was submitted to discharge part of condition 5. The details assess the quality of the light from the proposed lighting system and the effectiveness of the system's timing.

The proposed lighting scheme to increase the internal levels of illumination within the listed chapel at GOSH is considered to be beneficial to the ambience of the chapel without creating undue external clutter or visual intrusion by the introduction of the additional equipment.

The applicant will be required to monitor the approved lighting statement for a period of 12 months to ensure that the levels are appropriate. Details of the monitoring and ongoing management strategy are required 12 months after the occupation of the building.

Overall, the proposal would safeguard the special architectural and historic interest of the adjacent listed Chapel.

As such, the proposed development is in general accordance with policy D2 of the London Borough of Camden Local Plan 2017.

- 2 You are reminded that conditions 5 (part relating to monitoring of light strategy) and 11 (contamination) of planning permission ref: 2017/3377/P granted on 28/11/2017 are outstanding and require details to be submitted and approved.

In dealing with the application, the Council has sought to work with the applicant in a positive and proactive way in accordance with paragraph 38 of the National Planning Policy Framework 2019.
