Dear Sirs,

We intend to reduce the height and prune the following trees in our garden:

Rear Garden

Ash Tree - Height Reduction by 3 meters and trim.

Monkey Puzzle Tree – Height reduction by 3 meters.

Garden, Near Building's Foundation

Bay Tree – Height reduction by about 6 meters to make the tree stand tall by max 2.5 to 3 meters and pruned all around.

We require to carry the above job as soon as possible. In particular, the bay tree has become a point of concern not only to the building's foundation, but also to enter the garden from the pathway.

Kind regards

Shahriar & Janis Roozpeikar
