

Superplan products are produced from Ordnance Survey Digital Data.

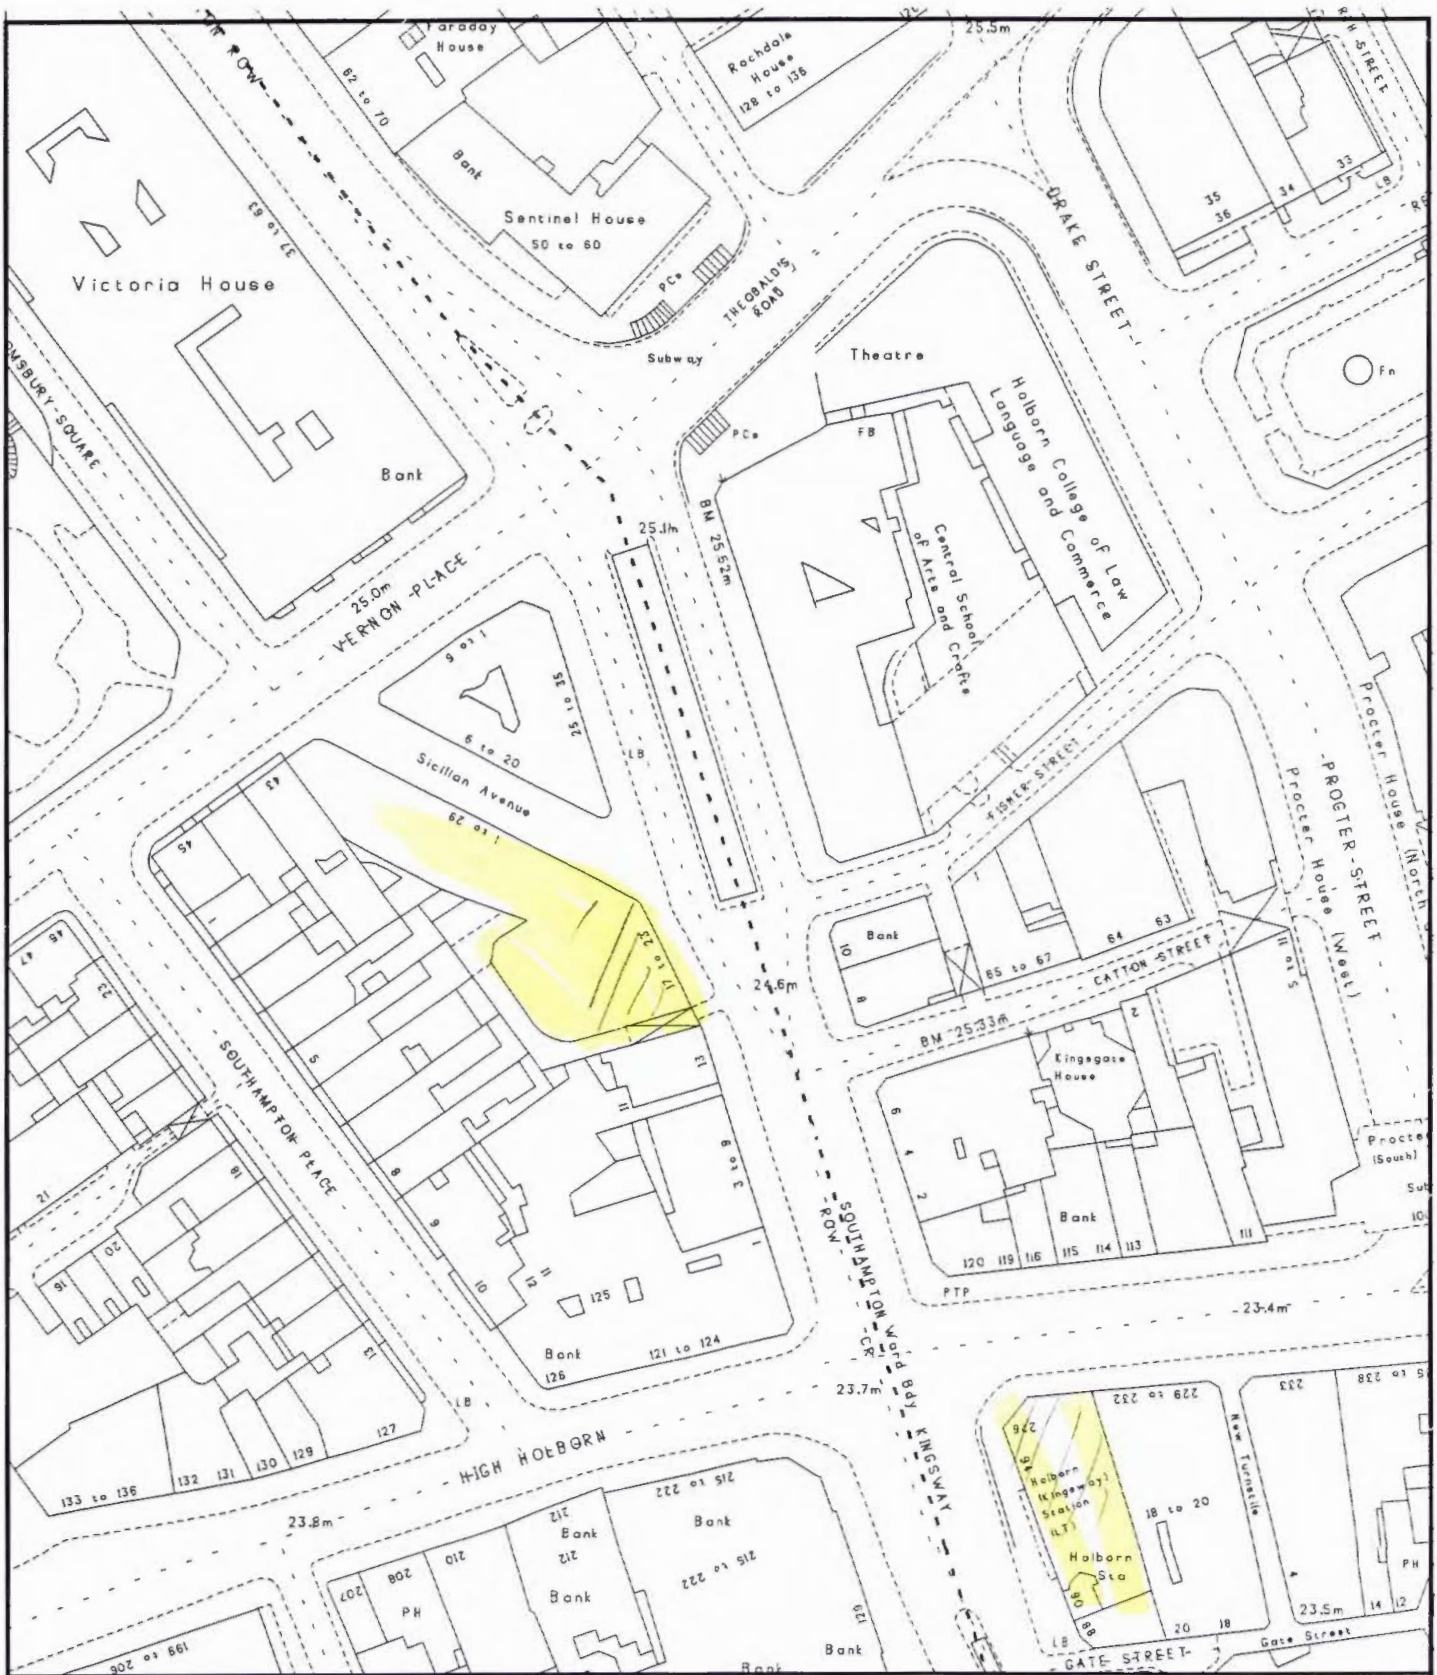

Where the Superplan Service is available, Ordnance Survey Agents can provide Superplan plots from updated digital data. These plots are produced using the latest survey information and are available on paper or film, and in site centred or National Grid sheet format.

Heights are given in metres above the Newlyn datum.

The representation of a road, track or path is no evidence of a right of way.

The Superplan map specification is available on request from Ordnance Survey Agents.
