I am objecting against these mobile phone masts because I would have NEVER moved into the top floor flat if they were already on top of the roof of Grasmere.

I am objecting against these mobile phone masts because I am very concerned about my health because the verdict is still out there, it is NOT proven 100 % that they are safe and will cause harm to human and animal welfare or not.

I am objecting against these mobile phone masts because I live right underneath them and I will lose in property value because of these mobile masts.

I am objecting against these mobile phone mast because it will interfere with the aesthetic of our building.

Our building was build at the end of the 1950th and was opened on 1952 by the Duke of Edinburgh.

Our building is an fine example of 20th century architecture.

I am objecting against these mobile masts because of my worries of vibration of the installation.

You have forgotten that our building takes the full forces of nature gales because we are the first high rise building west facing, shielding all the other buildings behind it and I am very concerned that this will constantly create vibrations and noise from the wind and the gales.

Also, Our building is right next to the fast open spaces of Regents Park, what is also an conserve area.

These masts will be visible from Regents Park and Primrose Hill. I know from my daily runs, I can see my building from Regents Park and Primrose Hill.

These masts will be also visible from street level.

These masts will be an negative feature to our building and the area.
