

## Aluminium copings and aluminium cappings

Guttercrest offers a wide range of aluminium rainwater products including gutters, rainwater pipes and cast hoppers to suit all types of property. Its aluminium rainwater systems are complemented by other ranges including aluminium fascias, soffits, wall copings and column casings.

Heavy duty and adaptable bracket system

100% recyclable

Easy and fast to install

Guttercrest offers a high quality total eaves solution. The company's extensive range includes aluminium guttering, cast, pressed and extruded gutters, aluminium downpipes and hopper heads. Guttercrest produces rainwater systems that are suitable for both historic and traditional buildings, requiring a period cast iron appearance, and contemporary buildings, where a clean-looking, flush fit solution may be needed. The company also manufactures aluminium fascias, aluminium soffits, aluminium wall copings, aluminium column casings, aluminium cladding and architectural fabrications, all in-house at their 40,000 sq. ft. state of the art production facility. Whether for a small residential property or a large public or commercial building, Guttercrest can turn vision into reality.

### APPLICATIONS

Guttercrest products are used on: residential housing, listed buildings, commercial buildings, retail properties, schools, colleges, hospitals and medical buildings, public buildings, and MOD buildings.

### DESCRIPTION

**Aluminium wall copings and aluminium wall cappings:** A high performance aluminium wall coping system that is extremely resilient to high wind loads. Guttercrest can manufacture items to suit most site requirements including radii, curved coping or faceted coping, raked and apex angles, pier caps, and cravats for balcony rails. This product is very easy to install. The company can also manufacture their coping as an aluminium capping.

**Aluminium gutters:** A range of standard guttering profiles and sizes includes: half round, beaded deep flow, moulded ogee, Victorian ogee, box gutters, and raked/shaped with plain gutters. Bespoke guttering sizes and profiles can be manufactured to customer requirements. Radii gutters, whether true curve or faceted, are a Guttercrest speciality.

**Aluminium downpipes:** Guttercrest has a large range of aluminium downpipes in all shapes and sizes. Most pipes are available with plain collars or traditional/Georgian cast collars to give a true period appearance. Round, square, rectangular and high security anti-climb downpipes are available,

with other shapes and sizes on request. Guttercrest also manufactures feature downpipe pipe brackets in Fleur de Lys, clover leaf and bespoke designs to add the finishing touch to a period property.

**Rainwater hopper heads:** A choice of over 40 cast hopper heads is offered to match original Victorian hoppers, as well as fabricated sheet hoppers to suit individual requirements.

**Aluminium fascias and aluminium soffits:** Guttercrest has extensive experience in the design and installation of aluminium fascias and soffits, so can offer a total eaves solution. From a simple fascia cover to complex true curved eaves, Guttercrest offer the highest quality products. The company's early inclusion in the design process ensures thought regarding the background and interfaces with other trades. The modular eaves systems are ideal for the current fast-track build. The aluminium fascias include bullnose, aerofoil, combined fascia-soffit, fascia cladding and aluminium verge/ bargeboard cladding. The aluminium soffits include: cassette, arrowhead, plank effect, and tray; the soffits are offered with a neat ventilation perforation. These systems are offered with both visible and secret fix, and a support system where required.

**Aluminium column casings:** Neat high quality column cladding available in round and square profiles as well as bespoke designs. These can be for external or internal applications. Aluminium beam casings are also available.

### APPEARANCE

Guttercrest products are normally supplied with a polyester powder-coated finish with a wide range of standard colours available, including a Heritage (cast iron textured effect) range. The company can also supply mill finish.

### SERVICES

**Technical support:** Guttercrest offers a full design and specification service including rainwater calculations, CAD drawings, BIM data, quotations and NBS Plus.
