2020/1332/P		08/06/2020 16:13:30	SUPPRT	I would like to register I am absolutely in favour of this measure. It should be sped up as much as possible as the state of our network is currently poor and need better connections especially as more of us work from home.
2020/1332/P		08/06/2020 17:29:06	OBJ	I am opposed to this application as we live in close proximity.
2020/1332/P		08/06/2020 15:54:11	NOBJ	Sounds brilliant. I support it fully and hope it is built.
2020/1332/P		08/06/2020 18:18:48	SUPPRT	I am a resident of Camden near to this location who currently experiences poor mobile phone coverage. I am in support of all applications for improvements to mobile networks which are sympathetic to the built environment and surrounds. I am therefore in full support of this application.
2020/1332/P		08/06/2020 12:03:48	JUST	5G is an untested technology on the general population and it is inappropriate and unreasonable to place masts without a wider public consultation on the "roll out". Camden Plan claims to deliver for the people. At least ask us first. What is the strategy here? Where is the community conversation about this? Irradiating people with incrementally increasing levels of microwave technology in the built environment without proper testing should not be allowed. Many other local authorities are taking this position both in this country and abroad. I therefore object.
2020/1332/P		08/06/2020 22:54:49	OBJ	Please provide supporting documentation and delay the process, as a lot of interested parties were/are unaware of this application.
