2020/2444T		11/06/2020 11:24:20	OBJ	Why fell a healthy bay tree in a conservation area when trees are the lungs of our poor stressed out city at the moment. We should be seeking to preserve our oxygen and respect the nature that is protecting all of us today. There can be no good reason to destroy this tree. Maybe the applicant is concerned with a personal take on aesthetics or light. This is not good reason enough. I object strongly to the destruction of any healthy tree in this conservation area that I have lived in for over 30 years. At the moment the planet is at the mercy of corona virus which attacks the lungs and the bodies ability to absorb oxygen. Trees have never been more important. They replenish and clean the air. This tree must remain.
