2020/1530/P		12/06/2020 10:40:18	OBJ	Objection - A lean-to shed (the proposed boiler room extension) has no place at the front of a period building in a conservation area. It should be located at the rear of the building, out of sight. Comment - Other aspects of the application - in particular the removal of the ugly bars on the front elevation windows - are welcome.
