2020/2450/T		14/06/2020 13:22:36	JUST	I wish to oppose this application because the removal of said trees will seriously destabilize the large bank of earth between the two properties. Also in the 1970s when 31 Dartmouth Park Hill was reconstructed, an enormous "H" shaped concrete truss was inserted into the foundations of 31 Dartmouth Pk Hill in order to combat the notorious subsidence problems for buildings constructed on Dartmouth Pk Hill. One of the pear trees is at 6.50 meters from the end wall of no; 31, I very much doubt if this could effect the stability of of no;31. I suggest the problem lies else where and not with the pear trees.

2020/2450/T		13/06/2020 10:42:07	JUST	As I understand it the residents of 31 Dartmouth Park Hill have no right of access to the waste land over which the pear tree hangs a few branches. Many native birds nest in this tree every year. In a year of the tree, when we are encouraged to plant trees, to take one down which has been on my property for over 150 years, seems strange. What exactly is the justification for this application ?
