QUERY
How does the RMG CCTV work on site
Response
<p>Recording The CCTV will be recorded on a Network Video Recorder [REDACTED] There will be a 24" screen at the recorder location to view the CCTV. The recorder will store the footage for a period of 31days at a continuous 4 images per second and overwrite in a first recorded first overwritten format. [REDACTED]</p> <p>Cameras The cameras [REDACTED] will be fixed varifocal domes affixed to the soffits of the building. The cameras will have day and night capabilities being colour during the day switching to black and white once the light level drops below 0.6 lux.</p> <p>Viewing The CCTV can be checked local to the recorder only with use of the on-site screen. [REDACTED] All recordings can be transferred to a usb stick for use on PC's and to give as evidence to others. [REDACTED]</p> <p>Registration It is required for the client to register the CCTV system with the ICO under Data Protection Law. It is also required for signage to be provided to advise people they are being recorded by CCTV, who is managing the system and why it is installed eg security and ASB. WLS will provide a number of signs as part of the contract with any special signs to be provided by the client.</p> <p>Residential CCTV The residential demise will operate a fully separate system [REDACTED] Both systems will cover the roller shutter entrance. The residential system will have a recorder installed [REDACTED] Should RMG need to see any footage on the residential system they will need to seek access from the building managers.</p>
