Subject: 24- 32 Stephenson Way - Bryen & Langley

Hi Jayne

I hope you are well.

Thanks for responding to our letters that were posted out regarding the works at 24 – 32 Stephenson Way.

Regarding your concern about working hours, the working hours/days will be Monday to Friday mainly for the duration of the project. Saturday will not be our normal day of work, but there may be some Saturdays over the course of the project where we will need to carry out some tasks.

We have met with Collins construction who are carrying out works nearby and we are in agreement to work alongside each other logistically to minimize the disturbance to ourselves and others.

We will be meeting with HS2 early next week before works commence to discuss how we work together to also minimize any disruption throughout the project duration.

We could issue you with monthly updates on programme of what is coming up next. We can also notify you in advance of any particular noisy works atleast 48 hours in advance. For the large part of the project most works will be internal so noisy works shouldn't be a problem.

We intend to work with all neighbours of our site to deliver a smooth build.

Kind regards

Tony
