2020/1668P		29/06/2020 17:26:33	INT	<p>We object for the request on the following grounds:</p> <ol style="list-style-type: none">1. The extension will have a significant adverse effect on our quality of living. It will effectively erect a wall directly opposite our bedroom window. This will reduce light and brightness and dramatically alter our line of vision.2. The extension will adversely affect our privacy. The proposed window will be gazing directly into our children and our bedroom - from about 40 feet or less. This will have an adverse effect on our quality of living.3. The proposal calls for an AC/ventilation unit on top of the extension. This breaks with the other building -- none of the immediate houses has erected a separate unit on the extension. Moreover, this will further exacerbate the negative impact on us and our quality of living. The ventilation unit extrude beyond the natural line and therefore will further abstract light to our children and our bedroom. Moreover, it poses a constant noise hazard. <p>On these grounds, we object to the erection of the extension and the additional construction of a ventilation unit on top of the extension. we are happy to provide additional details as needed.</p>
