| 2020/1912P | [REDACTED] | 03/07/2020 14:08:08 | OBJ | [REDACTED] of a run of seven identical terraced townhouses. At present the continual front roof slope of all these properties are plain tiled without a single roof light or window (no 33 has not installed the 3 roof lights it has shown drawn on their submission for existing elevations). Planning permissions for dormers to the back of these properties have previously been granted but not built, all without objection. As the proposal is for a full width dormer to the front of this property and would therefore be seen in full from street level, I believe this will set an unnecessary precedent, would be visually obtrusive and would undermine the uniform character of our street. I therefore object to their plans. |
