Subject: Fw: Application for massive mast outside Camden Town tube station

[EXTERNAL EMAIL] Beware – This email originated outside Camden Council and may be malicious Please take extra care with any links, attachments, requests to take action or for you to verify your password etc. Please note there have been reports of emails purporting to be about Covid 19 being used as cover for scams so extra vigilance is required.

P.s. I forgot to add the mast is not sensitively designed for the area, especially with the high volume of visitors. Camden Town has its own arty culture and this mast is very out of keeping with the area.

Kind regards,
Bronwen Cunliffe

Subject: Application for massive mast outside Camden Town tube station

Case Officer Sofie Fieldsend -

Application for massive mast outside Camden Town tube station

Application number 2020/2760/P Site Address - Footpath outside Camden Town Tube Station/No.176 Camden High Street, opposite No.201 Camden High Street. London NW1 8QL

This is an application for the installation of 60 foot pole atop which will be 5G antennae just outside Camden Town tube station by the mobile operator for the '3' telecom brand.

Dear Case Officer Sofie Fieldsend,

Regarding the application for a mast outside Camden Tube Station I object strongly. Without further research and published data for the public to see and decide, these masts are dangerous for health. It is a known fact people residing beside these masts suffer an increase in cancer and other life debilitating and threatening diseases. It is time Councils put the residents health before corporate greed. Camden town has probably the highest visitor influx for the market, as well as most locals, myself included using the shops and banks every week. I do not think I need to send you pages of data against these masts as I am sure you are being sent them anyway.

Who is going to pay and care for the increase in illness when these masts are installed, when the NHS is already struggling.

Regards,
Bronwen Cunliffe
