

-
- This detailed mechanical floor plan illustrates the layout of a hospital wing, focusing on room configurations and mechanical systems. The plan includes numerous rooms such as patient rooms (e.g., 02/110, 02/111, 02/112), a waiting area (02/104), a procedure room (02/213), and various support spaces like restrooms, showers, and storage. Mechanical systems are indicated by dashed lines and symbols, including supply and return air ducts, exhaust paths, and fan locations. Room numbers are clearly labeled throughout the plan, and specific areas like 'BAY 1' through 'BAY 5' are designated for patient care. The plan also shows structural elements like walls, doors, and windows, as well as utility areas and a central corridor system.
