QUANTITY:

ICON 60 FAN

The Airflow ICON60 72591701 ventilation fan is suitable for fitting into walls or ceilings in areas such as large bathrooms and kitchens.

The central "iris" shutter opens when switched on ensuring the silent running of the fan to help prevent noise infiltration and back draughts.

Easy to install due to the core drilled hole and its twist on/off cover enabling it to be fitted and fixed easily with its single side entry fixing screw.

The ICON60 comes complete with cantilever fixing lugs enabling a recessed installation on uneven surfaces.

The fan can be wired to come on with your room light or a separate remote switch.

**** THIS SUITES 150MM DUCT ****

3 Year warranty on unit.
