Appendices

Appendix 1: Site Plan and 3D Drawings

Appendix 2: Daylight and Sunlight Assessment Results

1 Introduction

- 1.1 Point 2 have been appointed by Dorrington Midtown Limited to undertake a daylight and sunlight assessment in relation to the proposed minor rooftop extension of 51-53 Hatton Garden, Holborn, London (the 'Site').
- 1.2 The proposal seeks planning permission for amendments to the rooftop, including the removal and consolidation of the existing plant from 7th floor level to an area on top of an existing plant room and lift overrun which will be screened (The 'Proposed Development').
- 1.3 This report assesses the daylight and sunlight effects of the proposed increase in massing on the surrounding residential properties. This analysis has been undertaken in accordance with the advice and recommendations set out in the BRE Guidelines 'Site Layout Planning for Daylight and Sunlight: A Guide to Good Practice' (2011).
- 1.4 The calculations within this report are based upon a 3D contextual model created from point cloud survey data, alongside the submitted 3D model, plans, elevations and sections that have been prepared by Piercy and Co.

Sources of Information

In the process of compiling this report, the following sources of information have been used:

2 Assessment Methodology

- 2.1 It is usual to assess any change in daylight and sunlight to neighbouring residential properties by reference to the guidelines set out in the 2011 Building Research Establishment (BRE) Report 'Site layout planning for daylight and sunlight - A guide to good practice' by Paul Littlefair. This document is widely used by planning authorities as the means by which to judge the effects of a scheme on neighbouring amenity. One of the primary sources for the BRE Report is the more detailed guidance contained within 'British Standard 8206 Part 2:2008'.
- 2.2 The BRE Guidelines are not mandatory, and they explicitly state that the numerical target values should be interpreted flexibly. While local planning authorities will consider a proposed scheme in relation to the BRE Guidelines, consideration should be given to the context within which a scheme is located as daylight and sunlight will be one of a number of planning considerations.
- 2.3 In relation to the properties surrounding a site, usually the local planning authority will only be concerned with the impact to main habitable accommodation (i.e. living rooms, bedrooms and kitchens) within residential properties. Commercial properties and non-habitable rooms such as bathrooms and hallways have not been considered within this report.
- 2.4 The BRE Guidelines provide two principal measures of daylight for assessing the impact on properties neighbouring a site, namely Vertical Sky Component (VSC) and No Sky Line (NSL). In terms of sunlight we examine the Annual Probable Sunlight Hours (APSH).
- 2.5 These measures of daylight and sunlight are discussed in the following paragraphs -

Diffuse Daylight

- 2.6 **Vertical Sky Component (VSC)** – VSC is a measure of the direct skylight reaching a point from an overcast sky. It is the ratio of the illuminance at a point on a given vertical plane to the illuminance at a point on a horizontal plane due to an unobstructed sky.
- 2.7 For existing buildings, the BRE Guidelines are based on the loss of VSC at a point at the centre of a window, on the outer plane of the wall.
- 2.8 The BRE Guidelines state that if the VSC at the centre of a window is less than 27%, and it is less than 0.8 times its former value (i.e. the proportional reduction is greater than 20%), then the reduction in skylight will be noticeable, and the existing building may be adversely affected.
- 2.9 **No-Sky Line (NSL)** - NSL is a measure of the distribution of daylight within a room. It maps out the region within a room where light can penetrate directly from the sky, and therefore accounts for the size of and number of windows by simple geometry.

- 2.10 The BRE suggest that if the area of the working plane within a room that can receive direct skylight is reduced to less than 0.8 times its former value, the effect will be noticeable.

Sunlight

- 2.11 **Annual Probable Sunlight Hours (APSH)** - In relation to sunlight, the BRE recommends that the APSH received at a given window in the proposed case should be at least 25% of the total available, including at least 5% in winter.
- 2.12 Where the proposed values fall short of these, and the absolute loss is greater than 4%, then the proposed values should not be less than 0.8 times their previous value in each period (i.e. the proportional reductions should not be greater than 20%).
- 2.13 The BRE Guidelines state that ‘...all main living rooms of dwellings, and conservatories, should be checked if they have a window facing within 90 degrees of due south. Kitchens and bedrooms are less important, although care should be taken not to block out too much sun’.
- 2.14 The APSH figures are calculated for each window, and where a room is served by more than one window the contribution of each is accounted for in the overall figures for the room. The acceptability criteria are applied to overall room-based figures.

3 The Existing Site

- 3.1 The development site is bound by Hatton Garden Road to the west, 54 Hatton Garden to the north, 17 Hatton Place to the east and 49-50 Hatton Garden to the south. The existing site consists of a seven-storey commercial building.
 - 3.2 Our understanding of the current site is illustrated below and also within drawings P1740/01 - 03 which can be found within Appendix 1 of this report.

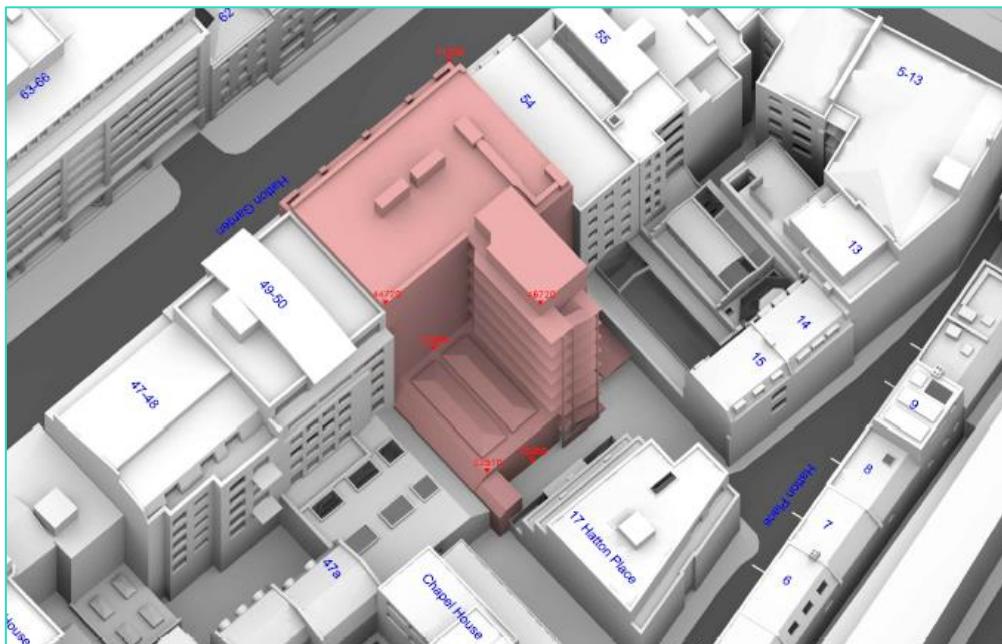

Image 1: The Existing Site

4 Proposed Development

- 4.1 The Proposed Development seeks planning permission for amendments to the rooftop, including the removal and consolidation of the existing plant from 7th floor level to an area on top of an existing plant room and lift overrun which will be screened.
- 4.2 The Proposed Development is illustrated below as well as in drawing numbers P1740/13, 14A & 15A located within Appendix 1.

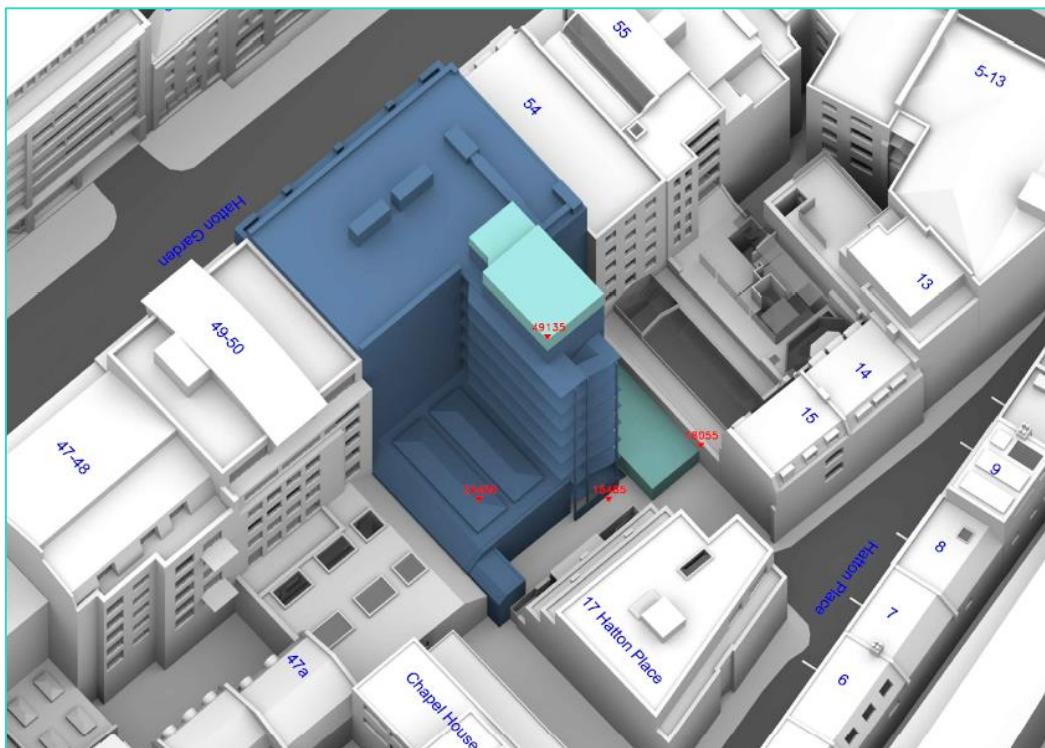

Image 2: The Proposed Development

5 Daylight and Sunlight to Neighbouring Properties

- 5.1 The BRE Guidelines recommend that daylight and sunlight assessments should be undertaken in relation to any properties which might be considered to have a reasonable expectation for natural light. This would ordinarily include any residential buildings within the vicinity of the Site.
- 5.2 The following properties have been included within our scope of analysis.
- | | |
|--|---|
| <ul style="list-style-type: none">▪ 55 Hatton Garden▪ 13 Hatton Place▪ 14 Hatton Place▪ 15 Hatton Place▪ 17 Hatton Place▪ 49-50 Hatton Garden▪ 47-48 Hatton Garden | <ul style="list-style-type: none">▪ 47a Hatton Garden▪ 9 Hatton Place▪ 8 Hatton Place▪ 18 St Cross Street▪ 19 St Cross Street▪ Kinetic House, 44 Hatton Garden |
|--|---|
- 5.3 The location of each of these properties can be identified in the drawings located in Appendix 1. Tables of results for the assessed properties are contained within Appendix 2.
- 5.4 Where possible, we have incorporated layout information for the surrounding properties into our analysis. This information has been sourced from online research of publicly available records.
- 5.5 We have managed to obtain full or partial floorplans for the following properties:
- | | |
|--|--|
| <ul style="list-style-type: none">▪ 55 Hatton Garden▪ 13 Hatton Place▪ 14 Hatton Place – Partial▪ 15 Hatton Place▪ 17 Hatton Place▪ 49-50 Hatton Garden – Partial | <ul style="list-style-type: none">▪ 9 Hatton Place▪ Hatton Place▪ 18 St Cross Street▪ 19 Street Cross Street▪ Kinetic House – 44 Hatton Garden |
|--|--|
- 5.6 In accordance with normal working practice we have not obtained access to any of these properties in order to confirm that the floorplans obtained accurately reflect the layout of the properties. Where applicable, the use of a room has been specified in the tables of results located in Appendix 2.

- 5.7 For those properties where layout information was not available, reasonable assumptions have been made as to the internal configurations and uses of the rooms behind the Site facing windows.
- 5.8 Rooms which can clearly be identified as non-habitable space (i.e. corridors, bathrooms or stairs) have not been included within the assessment. Any rooms where the uses are not clear from external inspection have been included within the assessment.

6 Daylight and Sunlight to Neighbours

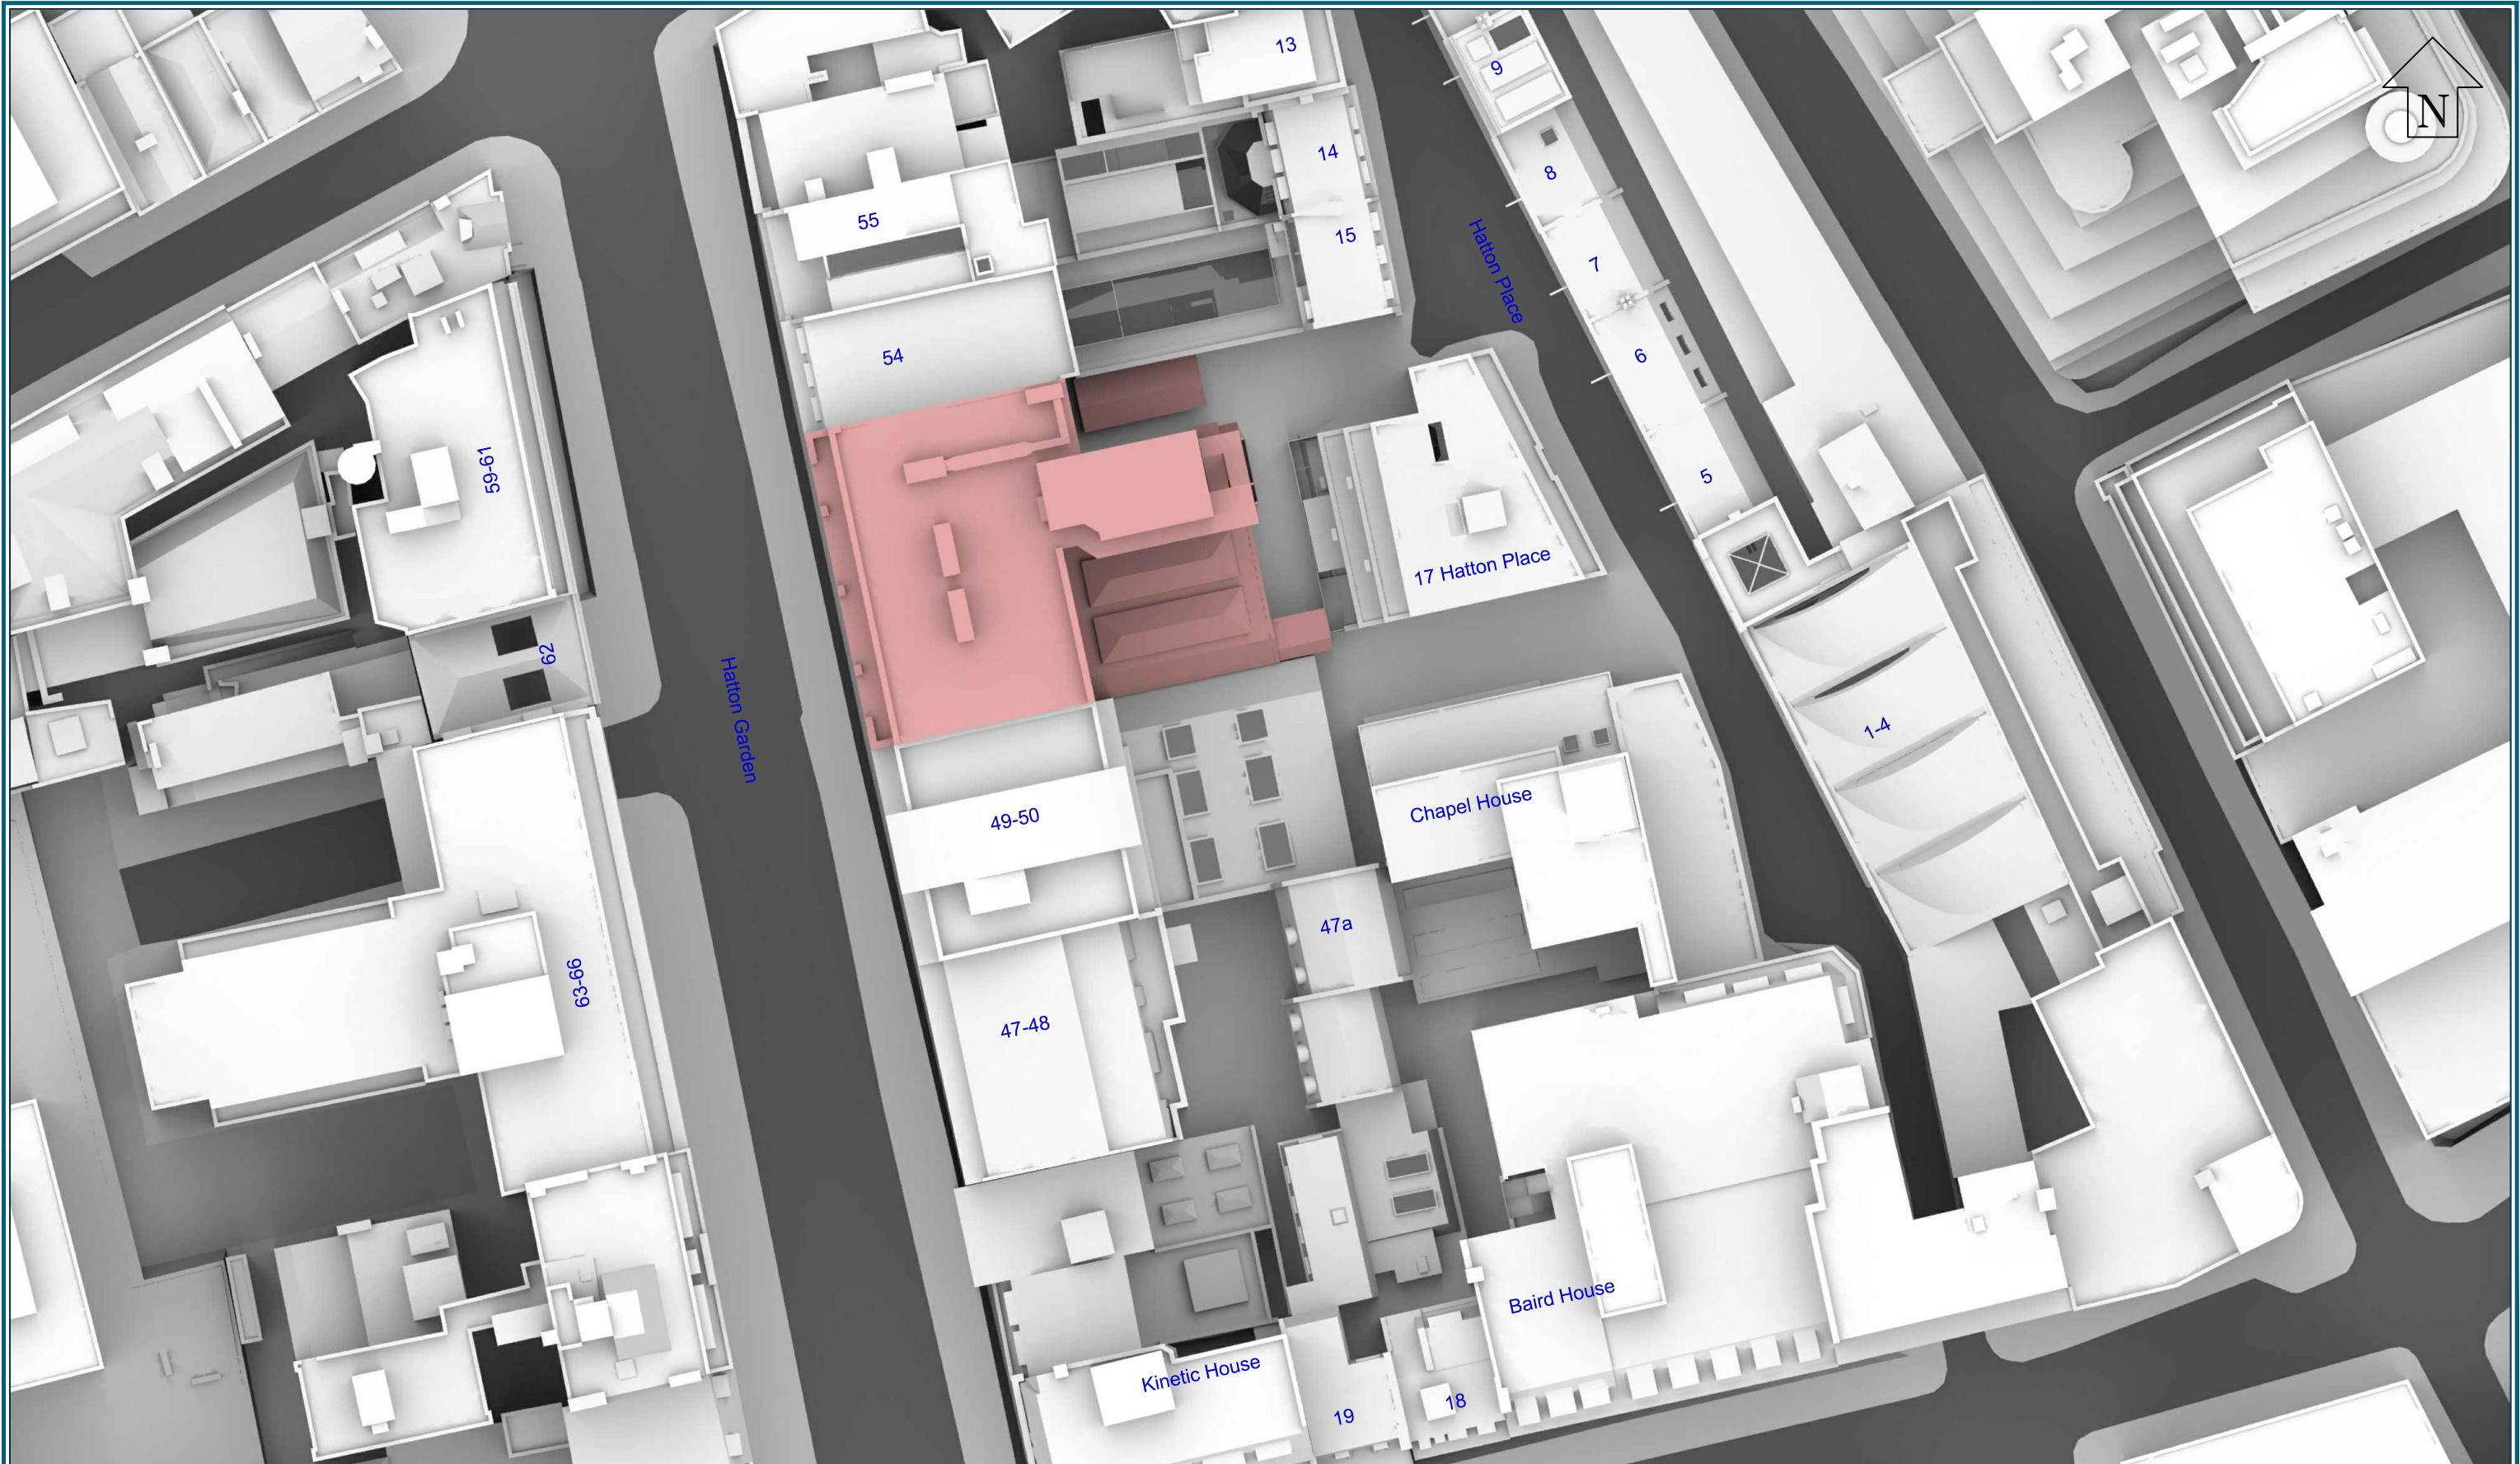

- 6.1 The results of our detailed daylight and sunlight assessments are shown on the tabulated results at Appendix 2 of this report.
- 6.2 The technical analysis undertaken demonstrates that all of the surrounding residential properties assessed will fully adhere to the BRE Guidelines for daylight (VSC and NSL) and sunlight (APSH).
- 6.3 Therefore, it is demonstrably the case that there will be no noticeable alteration in the daylight and sunlight amenity currently enjoyed by these properties following the implementation of the Proposed Development.

6

7 Summary and Conclusions

- 7.1 Point 2 have assessed the Piercy and Co scheme for the 51-53 Hatton Garden site to understand any changes in daylight or sunlight that may occur to neighbouring residential properties.
- 7.2 The technical analysis demonstrates that all the existing surrounding residential properties will fully adhere to the BRE Guidelines for daylight (VSC and NSL) and sunlight (APSH) following the implementation of the Proposed Development. Therefore, it is demonstrably the case that there will not be a noticeable change in daylight or sunlight amenity currently enjoyed by the surrounding residential properties.
- 7.3 The effects should therefore be considered acceptable and accord with Camden's Local Plan [2017] Policy A1: Managing the Impact of Development' which seeks to safeguard daylight and sunlight amenity to existing occupiers and neighbours.
