Dear Kristina,

Application for discharge for Condition 3.vi: "sample of aluminum rainscreen cladding material".

Following your site visit to inspect the different aluminum cladding options and our telephone conversation last Friday please find enclosed here the revised visualization of the Haverstock Hill elevation at Marina Ices, London NW3.

As discussed, we understand that the preference would be for a metallic anodized "Dark Bronze Deep Matt" colour reference **Interpon D2015 "Precis" Y2M011**.

For accuracy purposes we have also adjusted the image to reflect the real tone of the Grey Metal cladding specified originally by 21st Architecture. We believe that now the two colours complement each other as well as picking up some of the darker tones within the brickwork.

Your faithfully

Andrea Carbogno

Encl.
