2020/3096/T	Stephen Williams for and on behalf of the Netherhall Neighbourhood Association	15/07/2020 18:46:55	COMMNT	The application requests permission to fell a Cherry (T1) stating the 'Tree is infected with Ganoderma.' The application is by an Estate Agent/Property Consultant, Savills with no stated horticultural accreditation. No report from an accredited Horticulturalist is submitted with the application. Permission should not be granted without a report justifying the felling. This report should identify that this is Ganoderma lucidum (Varnish Fungus Rot), describe the extent of infection and resultant damage and give recommendations whether to treat or to fell.
