2020/3021/T	Ruth Rembaum	23/07/2020 17:38:42	COMMNT	I object to the felling of these beautiful old trees in our neighbourhood. They can certainly be pruned back if they have grown too tall, but they must be preserved. We live in a conservation area and trees must be protected.
2020/3021/T	belinda lees	23/07/2020 17:53:44	COMMNT	I strongly object to the felling of this Plane tree. We need more than ever to have green space around us for our health and wellbeing. This is especially important in this area of Camden which consistently breaks recommended levels of air pollution from road traffic. Plane trees are particularly efficient at taking up air pollution and shredding it in their bark and this is one of the main reasons these magnificent trees were specifically planted in London in the first place. Furthermore, to destroy ancient trees that provide a home to birds and insects and regulate the water levels of the environment would be a sacrilege. These gardens are an oasis in a increasingly urban jungle, please don't destroy them!
2020/3021/T	Stephen Christy	23/07/2020 17:08:18	OBJ	<p>I am strongly opposed to the felling of the tree the subject of this application. We are losing far too many mature trees in the area and once lost they are never replaced. It is difficult to understand what justifiable interest the applicant has in the felling of the subject tree save for purely personal gain which itself fails to take account of the benefit this sort of tree affords to the area generally.</p> <p>The felling of trees like this has a material adverse impact throughout the area at just the time when we should be caring for our environment.</p>
2020/3021/T	J Woolf	23/07/2020 17:37:55	OBJ	This is one of three trees in the same garden which are alleged to be disturbing a neighbouring property. However no evidence for damage to the neighbouring property was providing in previous application for felling exactly the same trees, made by the same neighbour (the applications were refused) and the neighbour has not provided any evidence this time, either. Our conservation area "The Gardens" is known to be leafy and full of trees and shrubs of all descriptions. These are beautiful mature trees of about a hundred years old and it makes no sense to fell them without a very good and proven reason. Enormous efforts are being made in London and throughout the country to plant more trees to benefit wildlife and combat global warning, and to fell mature trees without good reason flies in the face of the COuncil's greening and nature conservation efforts.
