2019/3406/P	Roland Hayes	31/07/2020 14:50:13	COMNOT	<p>The stair enclosure/extension is cantilevered and as such freestanding from the rear of 18 Princeton Street with a gap of between 100-180mm to allow air brick venting. This gap is a natural collection / trapping point for debris ¿ how will keeping this clear of rubbish be prevented?</p> <p>There is no detail of the Fire Rating status of the proposed glazing adjacent to the rooflight and rear ground floor window of 18 Princeton Street.</p>
