2020/3535/T	Annabel Cormack	12/08/2020 12:12:11	AMEND	<p>Not enough information: missing species of tree.</p> <p>It looks as though one should be removed and the other considerable reduced in height. The remaining tree should then be pruned to encourage balanced growth.</p> <p>At this time, it might be appropriate to plant an alternative tree, eventually to act as a replacement for both trees.</p>
