

# SEDUM VEGETATION BLANKET XF30I

The Bauder XF30I is our sedum blanket system featuring up to 11 species of sedums with some mosses and grasses to ensure plant diversity. All plants are selected to suit our climate and keep weight and maintenance to a minimum. The sedum blankets provide 90% ground coverage at installation.

Bauder has approximately 150,000m<sup>2</sup> under cultivation to cater for the ever increasing annual demand for Bauder sedum green roofs.

## KEY FEATURES

- Most lightweight green roof system available, making it ideal for retrofitting on a building or on new build construction.
- Delivers instant greening of a roof with sedums and other species all able to flourish in our climate
- Cost effective
- Developed to meet FLL guidelines
- Cradle-to-Cradle certification
- Sedum blankets are grown on our farm in the UK and delivered to site within 24 hours of harvesting
- Carry fire ratings of EXT.FAA and EXT.S.AA

The Bauder Xero Flor XF30I Sedum Blanket is a very lightweight and cost-effective way of quickly delivering an established sedum vegetation finish onto a flat roof.

The core of the multifunctional Xero Flor XF30I Sedum Blanket is its patented carrier, which holds both the substrate and vegetation firmly in place whilst also providing the water retention and drainage characteristics necessary to keep the vegetation healthy. The sedum vegetation provides a dense foliage that delivers colour and interest through the spring and early summer.

For speed of installation the product can be supplied in 10m rolls for crane-assisted positioning, and is also available in 2 x 1m roll sizes to allow for manual handling on smaller projects.

For further information on the Bauder XF30I sedum blanket green roof system please see the Bauder Flat Roof Solutions brochure or visit [www.bauder.co.uk](http://www.bauder.co.uk) and click on the green roof section.

## BAUDER SEDUM BLANKET XF30I INDICATIVE PLANT LIST
