

THERMAL EFFICIENCY

Crafting engineered timber and the very latest technology, Enfield Windows promise optimum insulation and longevity.

OUR TIMBER WINDOWS

RESPONSIBLY SOURCED & SUSTAINABLE TIMBER

Engineered multi-layer timber sections of European Redwood, Meranti Hardwood or Oak.

FACTORY FINISHED

Sprayed with preservative, primer and two coats of microporous paint for maximum protection and minimum maintenance.

SLIDING SASHES

Hung on lead weights and cords or can be spring balanced for fitting directly into brick. Sash lifts to bottom rail and are fitted with quadruple draft strips.

SILICONE WEATHER SEALS

Coloured or clear to specification, silicone seals are applied by the factory both inside and outside to protect against water ingress and guarantees reliable heat and sound insulation.

ENHANCED DOUBLE GLAZING & WARM EDGE SPACER BARS

Factory glazed and argon gas filled units, soft coat energy saving glass, which reflect heat back into the room, and low conductivity spacer bars. These specifications reduce heat loss in the units by almost twice as much as standard double-glazing. (1.1W/m²K U-value)

GLAZING OPTIONS

20mm/32mm and a triple glazed unit of 32mm. Fitted room side for added security.

OPTIMUM CLARITY

FULLY DRAINED AND VENTED

Channels help prevent the double glazing from misting.

ENGINEERED MULTI-LAYER TIMBER SECTIONS

Opposing wood grain directions to resist swelling and warping.
