Facia Light

The terminal will have provision for a facia light. This is available as a standard facia light or a taller advert facia light on the collar area. The following are the dimensions for the facia light decals. These dimensions are based on a decal being applied to the curved, forward-facing area on the inside of the facia light panel.

Standard Facia Light

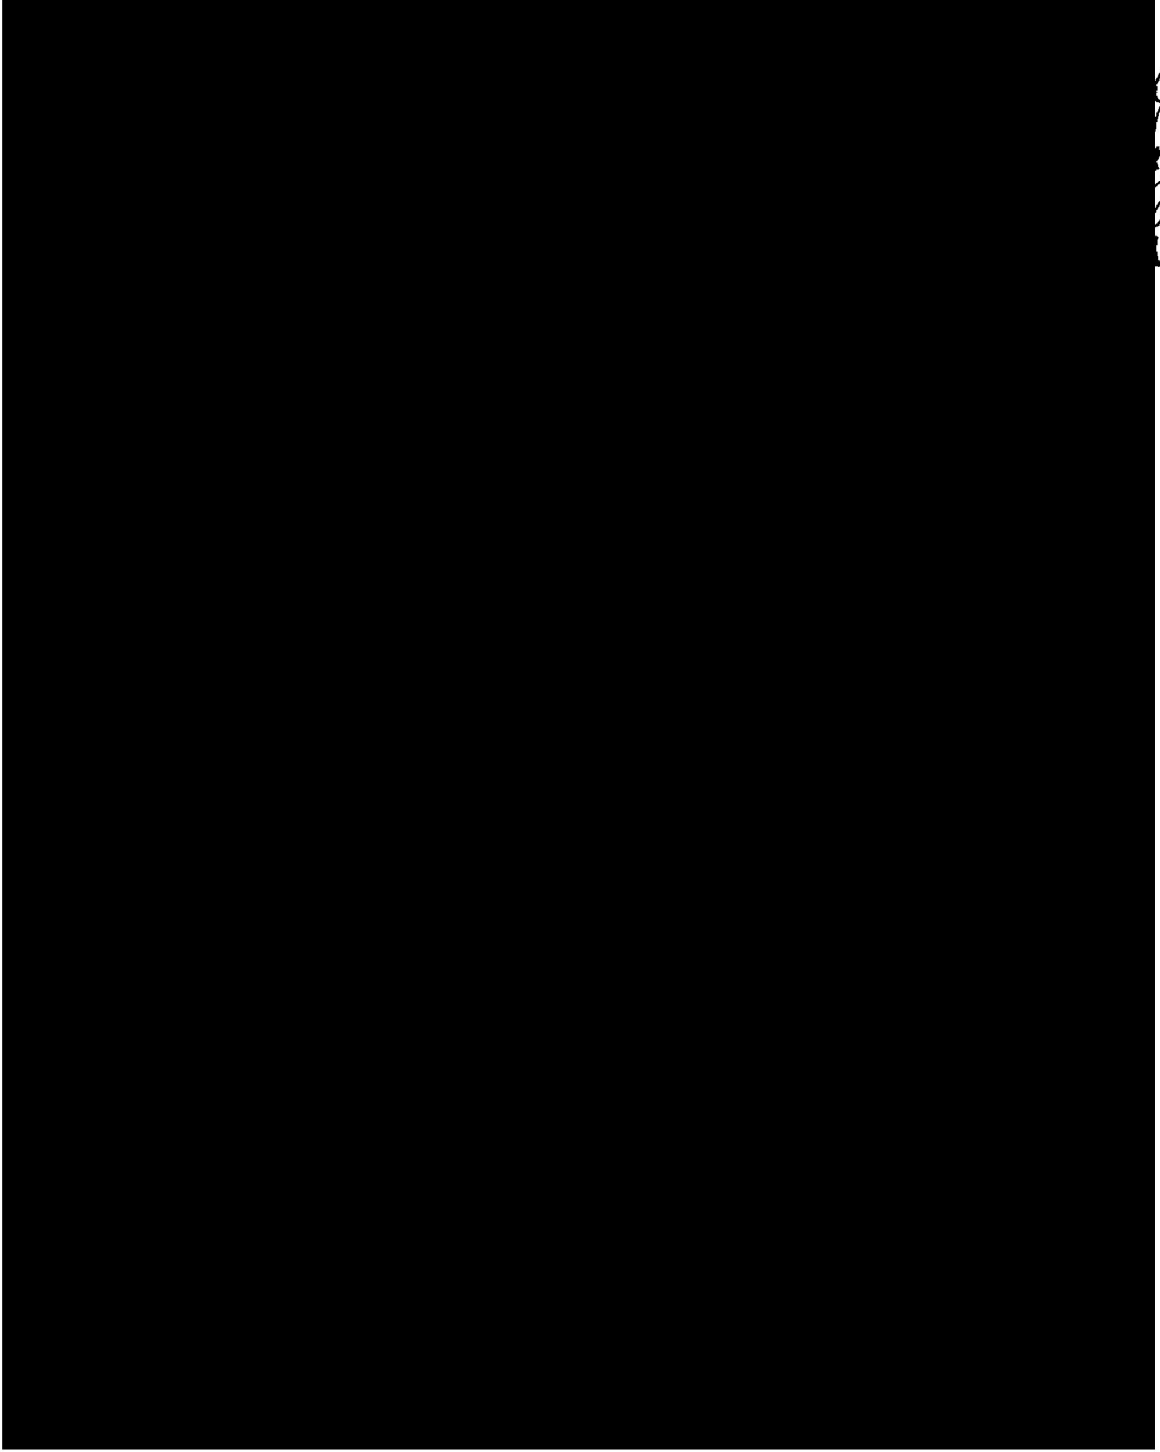

Advert Facia Light

The materials used for the facia light decal will depend on the process being used to apply the decal.
