

### Background

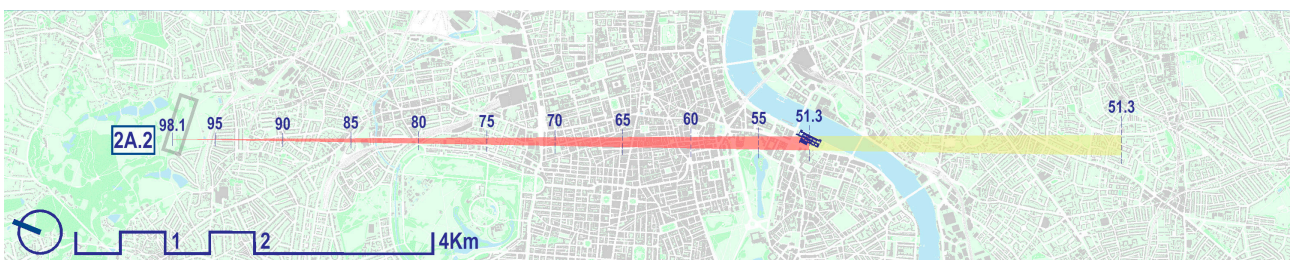

- 102 The form and materials of development in the background of St Paul's Cathedral should preserve or enhance the clarity with which the silhouette of the Cathedral can be distinguished from its background.
- 103 The backdrop of the Victoria Tower has significant influence over the viewer's ability to recognise the Palace of Westminster in the panorama. Change may occur in this backdrop if it is incremental, carefully designed, and of a small scale. No development in the background should dominate the Victoria Tower or Central Lobby Lantern.

View from Assessment Point 2A.2 Parliament Hill: the summit - looking toward the Palace of Westminster (at the orientation board). 527665.4E 186131.5N. Camera height 98.10m AOD. Aiming at Palace of Westminster (The Central Tower, above the lobby crossing). Bearing 158.6°, distance 7.1km.

### Management of the Viewing Location

- 104 Tree growth in the immediate foreground has the potential to reduce the quality of the view, and should be managed to ensure visibility of the panorama. Infrastructure that assists the viewer to understand the view, such as an up to date plaque, would enhance the viewing experience.
