To whom it may concern,

My wife and I own flat 117 in the building to which this planning application refers.

I would like to object particularly to the nature of the conversion of the windows. The form and elegance of Bedford Court Mansions will be damaged by the replacement suggested in this application - the curved glass that is currently present is a notable architectural feature. Obviously, the council has allowed various sorts of changes to other windows in the building over the years - but these are some of the originals, and so are particularly important to preserve.

Thanks,

Peter Dayan
