2020/3810/T	Simon lepper	06/10/2020 17:11:50	NOBJ	We completely support felling this tree. The species is very intrusive. It blocks light as well as drops leaves and saplings which grow quickly in the ground. Its branches have also started to grow over the roof of the council flats on Mornington Place. If it isn't taken down then this will ultimately cause damage to these properties.
