2020/4286/T	Mrs Lesley Stevas	01/10/2020 12:20:37	OBJ	<p>I object to this application.</p> <p>Cedar trees can provide habitats for invertebrates and other animals. If this tree is allowed to age, cracks and crevices which develop in the trunk and branches can provide nesting places for the tawny owl and a roost for bats. It is also highly aromatic.</p> <p>I cannot see any good reason to fell this cedar tree. It is highly visible from the road.</p> <p>Can you tell me why the owner wants it felled to the ground?</p>
