2020/3493/P	Philip Bristow	08/10/2020 11:12:15	COMMNT	<p>As owners of flat 6[the closest property to the proposed roof terrace within the building ] we are very concerned about potential noise pollution from a roof terrace caused by gatherings ,parties,music and talking that could impact on the quiet enjoyment of our property .This could become an issue all year round as terraces are designed to be outdoor rooms with patio heaters lighting ,outside electrical points ,built in speakers , and awnings often being fitted to accommodate usage all year round day and night whatever the weather . When windows are open in our flat , particularly in the summer months , the potential for noise pollution could be even worse .Many thanks for considering our comments .</p>
