Subject: Re: Planning application - 2020/2192/P - Flat 5, Bramshill Mansions, Dartmouth Park Hill

Hi Tony

I hope this finds you well.

Since our last communication we have had further discussions and advice from the builder, designer and window manufacturer and I am now able to submit the revised information requested for our planning application.

1) Existing and proposed front elevations (1:50).

2) Detailed proposed window elevation and section drawings (scale 1:20). Please find two documents attached.

3) Manufacturers specification or product document, or website link to the particular window unit or product.

Please find below:

a) a link to the relevant page on Facebook which shows both sash and casement windows and the website link

b) the manufacturer has also supplied a spec for the style of window that we are purchasing (attached) but they only have this spec with the STANDARD double-glazed window unit dimensions (4-12-4mm). The SLIMLINE double-glazed window unit dimensions (4-4-4mm) that we are purchasing are correct on the documents called 'Bramshill 101- SASH_WINDOW' and 'Bramshill 102- SASH_WINDOW ' as produced by the designer.

I hope all is sufficient for our application, but if you require anything further please let me know.

Kind regards

Claudia

CLAUDIA DULAK

The logo for 'open wide' is displayed in a white, lowercase, sans-serif font against a dark grey rectangular background. The word 'open' is on the left and 'wide' is on the right. A small orange dot is positioned above the letter 'i' in 'wide'.
