2020/4637/T	ARCHIE BARON	15/10/2020 10:43:59	COMNOT	<p>Just last year the Applicant received permission for crown reduction on this tree. The Applicant's own Tree Report at that time, from Specialist Tree Consultants, reported in a successful application which resulted in the removal of several other trees but retention of this one with a reduced crown: '3.2.3: The site's most significant tree is the Magnolia T8...which is in good condition and provides moderate amenity value to the site.'</p> <p>The Application makes no reference to a suitable alternative and given the overall need to retain trees, the character of the neighbourhood being so dependent on maintaining its trees, and the greater environmental benefits of retaining old trees rather than replacing them with new ones (which isn't proposed here), it seems wrong to fell to the ground 'the site's most significant tree'.</p>
