Sample Submittal Sheet

Comments:

Attached Doff Cleaning system information and Paint RID paint softener system.

- As per specification by Artemis conservation LTD paint stripping samples issued in March 2020.

The cutting of nails and then painting over, might be a problem as they might start to gain rust due to the water content on the façade and cause more damage with the new paint application. Please ensure to remove any M&E / wiring carefully and fully with the least damage the masonry as possible.
