2020/4828/T	M green	02/11/2020 11:25:28	COMMNT	How did this application even get registered, with such sketch which does not assist in locating the tree species or the grounds. Shading should not be a precursor for felling trees and trying to replant the same in the same location. I object strongly to the wasting and felling of this tree and this application.
