Dear Mr Bushell,

Re : Application No. PWX0202003 -Top Flat, 13 Tanza Road, London NW3

Please find enclosed four copies of our drawing 212 /TR 003 Revision B. This drawing supersedes our originally submitted scheme under above planning application. Revision B covers all changes as discussed and agreed with you 6 March 2002 after you had sight of our faxed sketches dated 4 March 2002.

As agreed our proposal now shows the new side valley infill wall set back from the two brick side gables and side elevation. From our repeated site visits and photographs, we now believe that this solution would make the new side wall virtually 'invisible' from either Hampstead Heath or Tanza Road. The lines of the existing valley sloping roof and gable roofs would be kept for this 1350mm set back depth. All new roof works would be constructed in materials (slate / reconstituted slate) of approved type and detail as to match the existing roofscape. The rest of the scheme is unchanged save internal alteration due to new position of the earlier mentioned wall.

I understand that you will treat these modifications as a revision of the original submission and that all the issues that you were concerned about earlier have now being dealt with.

If you need any more information then please do not hesitate to contact us. We await your earliest decision. Thank you for your assistance in this matter.

Yours faithfully,

Olga Vladic de P. Weal
