PLAN

Proposed_Kitchen

ELEVATION 4

It is proposed to re-arrange the original kitchen layout into a more ergonomical and space saving configuration, but to keep to the original area under the gallery.

The existing original extract hood is to be kept and re-positioned above the hob, but maintaining the existing sense of symmetry of the room layout.

All cupboard and drawer fronts are to be finished in Cream White Eggerboard, a close match to the existing melamine facing material.

The countertops are to be made out of Silestone Tigris Sand or granite of a similar colour to the Silestone, a more suitable and durable material than the existing laminate; this material would be used for all countertops throughout and would eliminate the existing strong discrepancy between the island and the surface under the wall cupboards.

Please refer to samples submitted with this application for proposed finishes.

General Notes
- Do not scale from this drawing
- All dimensions to be verified on site
- To be read in conjunction with all relevant documents
- In the event of discrepancy notify the Architect immediately
- All steel structural elements to be finished with intumescent coating.
- 30 minutes fire resistance. For all structural elements and connections see SE drawings.
