2020/4249/P	Humphrey Rang	07/11/2020 17:29:39	INT	<p>We have lived for many years at 1 Willow Road, and complained to Camden Council and the Freemason's Arms 2 years ago, when the new large and noisy ventilation plant was installed. Since then, the only response from the Freemason's has been the erection of a large and ugly wooden fence, which did little to reduce the noise, and which has now been removed on the instructions of Camden Planning Department.</p> <p>We are therefore glad to see plans for mitigation of the noise and odour problems.</p> <p>We note that the application refers to the detailed noise and odour reports, but does not explicitly state that the recommendations in these reports - specifically paragraphs 4.5 - 4.12 in the noise report, and the ESP and UVO units listed in the odour report - will be adopted. Approval should be conditional on these recommendations being followed in full.</p> <p>Recently, the plant has often been left running all night. As suggested, a timer should be fitted to avoid this. A further professional noise assessment should take place after the work is complete, and be submitted to Camden Council, to ensure that the necessary noise reduction has been achieved.</p>
