2020/4606/P	C Munroe	16/11/2020 16:56:32	OBJNOT	Considering the Council's recent approval to make Oakley Square north no entry from Crowndale Road I would like to add a further objection to this planning application. I have been informed by the Principal Transport Planner at Camden Council that, if approved, construction vehicles for this project will need to enter Oakley Square from the Eversholt street end. This will mean that the construction vehicles will be travelling the full length of our residential street. The new no-entry system has not been considered in this planning application. All residents have not been made aware of the new no-entry system and as such, they will not fully understand the potential issues around vehicles accessing the construction site. Residents should be consulted on the impact this project is likely to have and a Construction Management Plan should be developed before planning permission is granted. I would like to understand clearly how traffic, noise and pollution will be controlled and how long we would be expected to live with the disruption caused if this application is approved.
