## 1 NON-MATERIAL AMENDMENTS

On review of the approved scheme, certain site conditions require minor amendments to be necessary in order to construct the scheme. The submitted amendments are all required to enable the construction.

List of non-material amendments:

- Updated levels to reflect post-site-clearance survey and to allow for biodiverse roof build up to meet building regulations.
- General minor changes to layouts to comply with building regulations.
- Window W102 to front elevation relocated slightly and resized to allow for no. 85's roof overhang.
- Rear bi-fold door on house C decreased in height by two bricks for regularisation of bifolds across all terraces.
- Increased gradient of lean-to roofs to rear to allow for rainwater run off.
- 2F rear elevation window D212 decreased in width by approx. 300mm to fit in wall.
- 2F roof-light dimensions altered to allow for biodiverse roof edging.
- Correction to incorrectly sized entrance doors (too short) with a fan light above. Door height is to be corrected resulting in the fan light being lost.

The following pages show annotated elevations and plans demonstrating the amendments.
