

**MARCUS FOSTER - ARBORICULTURAL DESIGN & CONSULTANCY - TREE SURVEY**  
**16 Maresfield Gardens, London, NW3**  
**16th October 2020**

| Tree No | Species | Height (m) | Stem Diameter (mm) | Crown Spread (m) | Age Class | Structural Condition | Vitality | Condition Comments   | Recommendations                          | Tree Works Priority Rating | Inspection Priority Rating |
|---------|---------|------------|--------------------|------------------|-----------|----------------------|----------|--|--|----------------------------|----------------------------|
| T1      | Ash     | 12         | 640                | 3                | M         | P                    | P        | <p>Tree has advanced gannoderma spp fungal fruiting brackets at base within 5 x buttresses. Tree leans to south. Cherry tree roots growing directly adjacent to east and west (tree now removed). Decay clearly advanced within main stem as indicated from dull noise of sounding mallet. Single stem to 4m where bifurcates with sound main union. Significant cavity at 4.5m to west from major stem removal - seeping and partially occluded. Tree managed within past 4 weeks - 2 x stems / leaders remain with no branch framework. Reduced to 9m abd 12m height with no regenerative / epicormic growth remaining</p> | Fell to ground level and grind out stump | High (within 6 weeks)      | N/A                        |
