4. Description of Proposed Works

Please describe the proposed works:

The proposal will add two velux rooflights to the pitch of the roof, respectively to the north and south side of it, enabling natural light to a storage area. At the ground floor an additional extension is proposed to the rear enlarging the kitchen. New aluminium framed sliding and folding doors will allow a direct connection to the rear garden. In addition, a new rooflight will allow direct natural light in the dining area and the kitchen. The garage, now used as a storage space, will be converted into the utility and two new roof lights will be added.

The proposed rear extension will be L shaped to respect the stepped nature of the adjoining buildings. A canopy will be added to allow the user to enjoy the garden in all weather and to provide shade to the interiors. The glazed doors create a connection to the garden, somewhat similar to the existing situation.

The proposal is to landscape the gardens and particularly at the rear to provide more green cover and trees to make the garden more attractive while also improving privacy and contributing to the greening of the estate. A mature garden with trees and shrubs will obscure views in and out at ground level and enable the rear extension to appear more bedded in to the landscape. The intention is that the site regains the garden character that was originally intended. In addition we propose a low height garden studio at the rear of the garden that will be surrounded by planting.
