2020/4825/P	Visually Impaired in Camdenmary Nicholson	03/12/2020 13:49:58	NBJNOT	<p>Members of Visually Impaired in Camden are supportive of this planning application. Currently services are fragmented and being provided in outdated buildings.</p> <p>This development will provide a world leading integrated education, research and treatment facility fit for the 21st century.</p> <p>Visually Impaired in Camden's only real concern is access to the facility from key transport hubs and we are hopeful that this can be addressed satisfactorily during the development process.</p>
2020/4825/P	Charles Colquhoun	25/11/2020 14:52:46	SUPPRT	<p>Re: Planning application 2020/4825/P</p> <p>Thomas Pocklington Trust is a registered charity that works with and for blind and partially sighted people. We believe in a society where blind and partially sighted people can participate fully. Our strategy places emphasis on education, employment and engagement to support blind and partially sighted people to live the life they want to lead. Our strategic priorities are to increase awareness and understanding of the needs and aspirations of blind and partially sighted people. We are committed to working with partners and developing and implementing activities and services which meet these needs to increase independence and improve lives.</p> <p>We are writing to express support for the partial redevelopment proposals for the part of the St Pancras Hospital site in the Camley Street area. The detailed proposals are as set out in planning application number 2020/4825/P.</p> <p>The development, which is put forward by a partnership between Moorfields Hospital, Moorfields Eye Charity and University College London Institute of Ophthalmology, will see the construction of a new shared home that will enable the partners to deliver high quality clinical, research and education outcomes. The new facility will offer an enhanced experience for patients and staff and help to improve the pace of the development of new research and treatments.</p> <p>As you would expect, these are very important benefits for people living with sight loss both in London and beyond. Moorfields Eye Hospital has been a world leader in medical research, training and eyecare for 200 years and we are delighted to see these proposals brought forward to build on their record and that of their partners.</p> <p>We would urge the London Borough of Camden to consider carefully the evidence submitted in support of the application, including reflecting that the proposed development meets national, strategic and local planning policy priorities to deliver a quality mixed-use development.</p> <p>Thank you for your consideration.</p> <p>Charles Colquhoun Chief Executive Thomas Pocklington Trust</p>
