Why is the given reason 'Both trees are growing out of concrete and need to be removed' a valid one? Has appropriate tree management been carried out to these trees in the past? If there is a problem (not clear from the photos), could this be resolved by appropriate and periodic pruning? Has this situation been assessed by an arborist?</p> <p>Nothing is listed as far as I can tell regarding replacing the trees.</p> <p>I believe the application is unwarranted and the reason and evidence given flimsy. It is crucial to maintain as many trees as possible in this area as they provide environmental support on many levels and enhance the character and idea behind a conservation area.</p> <p>Thank you.</p>
