2020/4540/P	Redington Frogmal Association	27/11/2020 14:15:59	INT	<p>The Redington Frogmal Association has no objections to rear proposals, but objects strongly to the proposed gates to front boundary wall.</p> <p>The property frontage is shared with its twin semidetached and sits at northwest end of chesterford Gdns. The current characteristic of frontages to this type of property is either hedges that act as barriers to pavement, or low and high brick walls that sit in front of established hedges. The aspirations of the Redington Frogmal Association has been noted in Character appraisals; as to avoid / prevent gated communities. This proposal of electric railings with obscure backing will unfortunately form this perception and will be detrimental to our safe and green community. Please refuse this section of this application on these grounds.</p>
