

Application No:	Consultees Name:	Received:	Comment:	Response:
2020/4543/P	Betty Jackson	06/12/2020 20:42:42	OBJ	<p>The gas workers had put the gas pipes up on the outside of Block one, along the front of flats 18 to 25. My first thought was that it contravenes the Grade II Listed status of the estate. My second thought was that it is open to vandalism and a fire risk.</p> <p>There was no consultation with those dwelling here, and I would ask you to think again about your unsightly plans. There must be a better way.</p> <p>Thank you.</p>
2020/4543/P	Ayshea Hameeduddin	05/12/2020 23:51:55	COMMNT	<p>I am a resident on the upper levels of the Dunboyne Road Estate where these gas pipes have been installed. There was no notification or consultation on the installation of these pipes. The pipes are intrusive and ruin the aesthetic of the Estate. As you know Neave Brown is a late RIBA gold medalist and Dunboyne Road is on the World map because of its unique architecture which is celebrated worldwide- as a grade II listed building it is extremely sad to see such little regard and respect shown to the design and spirit of the estate. I ask for these pipes to be installed in such a way that is not detrimental to the architectural beauty of the estate. Camden has neglected to consult the residents who live here and as such no further works should be carried out without full transparency and discussion. I strongly object to these works in the current state.</p>
2020/4543/P	Antonia Burrows	06/12/2020 20:07:11	OBJ	<p>I object to this revised application on several grounds</p> <p>The consultation process for the original application was not carried out properly - residents were not notified of the initial application or given meaningful opportunity to object</p> <p>The description of the design in the submitted plans does not give an accurate representation of its impact, or provide necessary detail to do so (they do not specify the distance of the gap between the underside of the balcony and the pipe - a crucial detail)</p> <p>The plans involve the installation of pipework that would be an eyesore, certainly not 'discreet' as described, and against the architectural spirit of the Grade II listed estate</p> <p>There are better alternatives to the plans, which seem not to have been considered - if residents had been properly consulted</p>
