2020/5115/P	Mark ward	30/12/2020 16:31:19	OBJ	<p>I am the owner of 4 Maresfield gardens and my bedroom overlooks the rear gardens of 2 Maresfield within which the AIR SOURCE HEAT PUMPS are to be housed. I am concerned that the noise assessment has not been undertaken from our property's perspective. There are no fences or other obstructions between the pump housing and our bedroom and I fear the noise generated, particularly at night time, will spoil our quiet enjoyment and will restrict our ability to have an open window in our bedroom and sleep peacefully.</p> <p>If the pumps are to be installed, why not locate them at the side of the coach house so that 2 Maresfield acts as a blocker for the sound with only the church, which will not be occupied at night time, directly exposed to the noise?</p>
