2020/5605/A	Mr and Dr Sachs-Simpson	02/02/2021 15:32:40	SUPPRT	<p>We support the proposed fixed signs and lighting on the building, but not the freestanding boards on the pavement (which are likely to be an obstruction on a busy corner). The signs appear to us appropriate and stylish on a building that clearly forms part of the commercial strip on Kentish Town Road rather than the residential area further down Patshull Road. (It is separated from the residential area by a service road and an entrance to a car repair shop.) This enlivens a corner that has been dull and neglected for many years. We are local residents and not connected in any way with the proprietors of the venue. We have not been contacted by any of the local organisations who have commented and therefore they cannot be taken as representing our views or other local residents.</p>
