2020/5962/P	Cllr Leo Cassarani	06/02/2021 16:48:24	COMM	<p>I'm concerned about the proposal to demolish the front boundary wall, create yet another dropped kerb, and replace the current (albeit limited) front garden with two parking spaces. I believe this will be detrimental to the South Hampstead Conservation Area will constitute an overall loss of amenity to Compayne Gardens.</p> <p>There is a widespread feeling in the area that too many dropped kerbs have been granted by the council in the past, leading to a loss of far too many landscaped front gardens. Street parking is widely available and the council has policies that seek to discourage car use, so on a cost/benefit basis I am not satisfied that this application should be granted in its current form.</p>
2020/5962/P	Lucy Ashdown	08/02/2021 10:21:34	OBJ	<p>I would like to object to this alteration on the following grounds:</p> <p>It removes on street parking for other residents.</p> <p>On past experience, this is a permanent change removing green space which is contrary to climate change issues as well as the removal of greenery for the whole community.</p> <p>It is contrary to the spirit of the following of Camden's Planning Guidance documents:</p> <p>Amenity: this is the further destruction of the beauty of the housing stock in a conservation area.</p> <p>Biodiversity: Further erosion of green space</p> <p>Health &amp; wellbeing: These front gardens benefit the whole community and impact health &amp; wellbeing.</p> <p>It is hard to understand why Camden Council isn't preventing further loss of green space and, in this case, prioritising private car ownership over green space. This will almost certainly be a permanent loss and does not protect future occupants, another of Camden's stated aims.</p>
2020/5962/P	E.Nadler	06/02/2021 09:27:44	COMMNT	<p>I object on the following grounds:</p> <ol style="list-style-type: none"> <li>1) Reduction of garden space with resulting loss of visual amenity for the community and harm to wildlife.</li> <li>2) Loss of on-street parking space for the general community.</li> <li>3) Experience shows that such changes are inevitably permanent and cause a gradual degradation of the beauty of this conservation area.</li> <li>4) Prioritisation of private motor vehicles goes against the urgent need to mitigate climate change.</li> <li>5) The proposed changes goes against the spirit of Camden's car-free policy.</li> </ol>
